Implementation of information systems as an organisational

change in the research and development approach for researching and developing information systems. The main point of view is to look at the implementation of information systems as an organisational construction, comprising learning and innovation processes where different actors in the organisation are involved and influence the actions adopted. In this study, it is emphasised that there is

From Information Management to Knowledge Management

Most extant knowledge management systems are constrained by their overly rational, static and acontextual view of knowledge. Effectiveness of such systems is constrained by the rapid and discontinuous change that characterizes new organizational environments. The prevailing knowledge management paradigm limits itself by its emphasis on convergence and consensus-oriented processing of

<http://tecniplas.co/From-Information-Management-to-Knowledge-Management--.pdf>

Information system Wikipedia

Information systems (IS) are formal, sociotechnical, organizational systems designed to collect, process, store, and distribute information. In a sociotechnical perspective, information systems are composed by four components: task, people, structure (or roles), and technology.
